Subject: Damper cleaning

Reference:	Table	Item	Code
	11-A	22	2812030769
	15-A	15	2812030932

Accomplishment: Immediate

The present document shows how to clean the oil that may possibly remain in the final assembly stage of the dampers. This results in a situation that makes the damper look like it is leaking oil but it is not.

Using a plastic mallet disassemble the platform as shown in the pictures below

Once the platform is removed clean the oil that may remain in the area shown below

Once cleaned, with the help of a plastic mallet fit back the platform
